Description

This design from Nelson Design Group breathes new life into the term “duplex”. Each home includes a two-story covered porch with columns to provide the perfect shade for sunny days. A large living area with fireplace is adjacent to the dining room with columns at the entry. You’ll find a bar with additional seating dividing the kitchen from the dining room. A private, amenity-filled master suite completes the main level of each home. The upper floor houses two secondary bedrooms with porch access and a built-in computer desk. Each home also includes a one-car garage, the connecting point for this duplex design.
