Description

MEN 5057

From award-winning designer Michael E. Nelson comes a stunning addition to our Rustic House Collection. The Rockford Place has great rustic charm, a classic white exterior contrasting with exposed timbers and stone and shake accents. This rustic beauty gives you just over 2,500 sq.ft. of living space with 4 bedrooms, 3 full baths, and 1 half bath. The inside of the home is just as stunning, made for those with discerning tastes.

Formal Dining and Entry

Entering The Rockford Place from the stunning covered porch, you walk through the double entry doors into the Foyer, where high ceilings characterize the stateliness of the home.

To your left, the formal Dining Room features those same high ceilings with a slope. A large picture window faces the front of the home for charming natural light and a peaceful view of the front yard. The Dining Room is connected to the Kitchen through a convenient Butler's Pantry, complete with a wet bar and mini fridge. This gives you a great way to stage courses and beverages, or serve appetizers, during a dinner party.

Open Floor Plan

Straight ahead of the Foyer are the Great Room and Kitchen, together making up the expansive open floor plan. The Great Room is dominated by a large brickwork gas fireplace on the right wall of the space, while the rear wall features a sliding glass door that opens onto the covered Outdoor Living Area.

Outdoor Living at its Finest

The Outdoor Living Area lies below a vaulted ceiling with exposed timber beams. The outdoor grill is located beside a sink, effectively limiting the amount of trips your home's designated grill master has to take inside. It also has a large masonry fireplace facing the rear of the property so that even on the chilliest of evenings, you can be all warm and snuggly.

Spacious Kitchen

The Great Room flows seamlessly into the Kitchen by a large eat-at island. This island not only gives you bar seating for 10, but also provides a perfect place for prepping for or cleaning up after a large meal. The island features a space for a sink, dishwasher, and microwave facing the Great Room so you can keep an eye on things while cleaning up. The rest of the kitchen gives you loads of counterspace with room for a double oven, oversized range, and both a refrigerator and freezer.

Life's Little Messes

Down the hall you will find a convenient half bath for guests. The large Laundry Room is also found here and comes complete with counterspace for folding, as well as hanging storage over the washer and dryer!

Grand Master Suite

Down this same hall, at the rear of The Rockford Place plan, your Master Suite lacks nothing in space or amenities. The large master bedroom gives you a wonderful view of the backyard through a triple window and boasts private access to the Outdoor Living Area. The Master Bath has plenty of room to house his and her vanities, a free-standing tub, and a large glass shower and still allow you and your partner to get ready in the morning without bumping elbows! The master closet is nothing short of luxury, with tons of space for even the most ardent of shoppers.

Room To Grow

On the other side of The Rockford Place, you will find Bedrooms 2, 3 and 4. Bedroom 2 has a window that looks out onto the covered front porch and is accessed directly from the Foyer. It also features its own walk-in closet!

Bedrooms 2 and 3 are located within a hallway off from the Great Room, where the full bathroom shared by all bedrooms is also found. Bedroom 3 lies adjacent to Bedroom 2 and has a large window that faces the side of the home, along with a sizeable walk-in closet. Bedroom 4 is on the opposite end of the hallway and features the largest closet of them all.

Private Bonus Space!

Upstairs, you will find a Bonus Room above the 2-car garage with a stunning sloped ceiling. The rest of the space is entirely devoted to this large room, featuring a huge walk-in closet and full bath on the other side of the stairs. This makes it perfect for a teenager in need of their own private space! So that this space isn't so secluded from the rest of the home, you also have the option to add an arched opening balcony overlooking the open floor plan below.
