## Description

Space and luxury. These are the two words that can be used to describe this Michael E. Nelson plan. Entertaining is a breeze in this large home. There are a lot of places to entertain both in and outside of this home. The main floor features a large great room, spacious kitchen, the master suite, and access to the rear covered porch as well as the screened grilling porch located near the kitchen. The walk-out basement level offers further space and amenities such as a game room, a second master suite, an office, and an exercise room. A covered patio is found on this level, too. From the patio is also convenient access to a pool bath featuring a spacious shower.

Need even more space? Well, the upper level of the home has space available for an optional apartment. You can easily add this option to make this large and luxurious home even bigger and better.
